

## Press Release

### **Aquila Capital acquires 24 MW operating Swedish wind farm for a Swiss investment foundation**

**Hamburg, 01 December 2022** – Aquila Capital, the sustainable investment management and asset development company headquartered in Hamburg, Germany, has advised a Swiss investment foundation on the acquisition of a 24 MW operating wind farm in the southwest of Sweden.

Going forward, Aquila Capital will manage the investment for the Swiss investment foundation. The seller of the asset was a vehicle managed by Prime Capital AG, an independent asset management firm and financial services provider, specialising in alternative investments.

The 24 MW wind farm generates sufficient electricity to power the equivalent of 22,500 European households per year. As the asset is in operation, production is already contributing to climate goals and revenue streams from the feed-in of the green electricity produced will be generated with immediate effect. With this acquisition, Aquila Capital is expanding its position as a leading asset manager in the field of renewable energy in the Nordic countries.

Maurice Jäckel, Senior Manager, Partnership and Portfolio Advisory at Aquila Clean Energy EMEA, Aquila Capital's clean energy development platform in Europe, comments: *"Due to its outstanding location, less than 100 km from the Baltic Sea and close to the largest lake in Sweden, Lake Vänern, this wind farm has a capacity factor comparable to some offshore wind farms. We are delighted to add a wind farm with such a production profile."*

Till Schulz-Eickhorst, Portfolio Officer and Managing Director at Aquila Capital Investmentgesellschaft, the licensed alternative investment fund management entity of Aquila Capital, says: *"We are very pleased to have secured a Swedish operating wind farm on behalf of our investor. This asset will contribute revenue immediately and further diversify the geography and technology of the portfolio."*

## About Aquila Capital

Aquila Capital is an investment and asset development company focused on generating and managing essential assets on behalf of its clients. By investing in clean energy and sustainable infrastructure, Aquila Capital contributes to the global energy transition and strengthens the world's infrastructure backbone. The company initiates, develops and manages essential assets along the entire value chain and over asset lifetimes. Currently, Aquila Capital manages more than EUR 13 billion on behalf of institutional investors worldwide. Its primary objective is to generate performance for its clients by managing the complexity of essential assets.

Today, the company manages wind energy, solar PV and hydropower assets of 11.1 GW capacity. Additionally, 1.7 million square metres of sustainable real estate and green logistics projects have been completed or are under development. Aquila Capital also invests in energy efficiency, carbon forestry and data centres. The company has been carbon neutral since 2006. Sustainability has always been part of Aquila Capital's value system and is an integral part of its investment strategies, processes and management of assets. The company has around 630 employees from 48 nations, operating in 16 offices in 15 countries worldwide.
