

Aquila Capital offsets CO₂ emissions of PEI Alternative Insight's 2019 Global Summit in Berlin

- **Cooperation with Klimainvest Green Concepts neutralizes roughly 1,100 tons of CO₂ emissions caused by participants and the event location via investments in certified climate protection projects**

Hamburg, 12 March 2019 – The alternative investment specialist Aquila Capital has mandated Klimainvest Green Concepts, a Hamburg-based energy and climate protection agency, to offset all CO₂ emissions related to this year's Global Summit 2019 by PEI Alternative Insight in Berlin, one of the world's biggest conferences on infrastructure investments. The emissions, caused by travel and accommodation of the participants as well as the venue's consumption in terms of water, heating, catering, and others, will be compensated by targeted investments in certified climate protection projects. The event's CO₂ footprint will amount to approximately 1,100 tons.

Roman Rosslenbroich, Co-Founder and CEO of Aquila Capital, comments: "As environmental partner of this year's Global Summit, we are delighted to be able to draw attention to the important issue of climate change by making the conference climate-neutral. At Aquila Capital, we have always been committed to sustainability and it is important to us to encourage other companies to act climate conscious as well. The possibilities here are endless and can be economic and ecological at the same time. We have produced over 8.9 TWh of electricity since our first acquisition of a renewable energy asset. This translates to supplying 2.5 million European households for one year and CO₂ emission savings of roughly 3.6 million tons. With our European Energy Transition-strategy, we invest not only in the production of renewable energy but also in its storage and transmission technologies so that we can provide green electricity regardless of the time of year or day. We are also acting sustainable in the Real Estate sector, for instance by investing in green logistic centers or offsetting our residential properties' greenhouse gas emissions."

At this year's Global Summit 2019, Aquila Capital is once more represented as panelist and speaker, among other topics in the context of specialized asset management and hydro investments.

Aquila Capital has been working with KlimalInvest Green Concepts since its foundation in 2009 to offset the CO2 emissions of the entire group. The climate initiative adheres to the Gold Standard and VCS (Verified Carbon Standard) standards.
